

ProPlay® shock pads

Play smart.  
Reduce impact.

## Engineered from repurposed foam

ProPlay shock pads are manufactured from high-quality repurposed foam, delivering exceptional performance, superior drainage, and long-lasting comfort. Our sustainable solution enhances the safety and durability of synthetic turf systems - on sports fields, playgrounds, and beyond.

## Designed for performance

ProPlay shock pads are engineered in a puzzle-shaped design. As synthetic turf systems evolve with less or no infill and greater demands, ProPlay remains essential to today's high-performance fields.

## Continuously giving foam a purpose

At Schmitz Foam, sustainability is more than a promise - it's a practice. We transform post-industrial high-quality material into shock pads. And when ProPlay reaches the end of its use, it can be returned for recycling closing the loop for a truly circular solution.

Proven shock absorption  
and impact attenuation

Made from high  
quality repurposed foam

Excellent vertical and horizontal  
drainage capability

## Driven by innovation

Since the late 1980s, Schmitz Foam Products has led the way in innovation and quality within the synthetic turf industry. That legacy gave rise to ProPlay: a premium and pioneering solution in shock pad technology, that continues to set the standard for safety, comfort, and long-term performance worldwide.

## Proven by quality

Behind ProPlay stands a fully integrated operation from selecting the highest-grade foams to in-house performance testing. Our dedicated team ensures strict raw material control, consistent quality, and proven durability. With complete focus on shock pads, Schmitz Foam Products delivers performance you can trust every time.

# Engineered with passion

## ✓ **Foam is in our DNA**

Founded in 1935, we bring proven experience and a passion for innovative foam solutions.

## ✓ **25 years warranty**

Our shock pads are engineered for durability and long-term performance and backed by a 25-year warranty.

## ✓ **Meets EN 15330-4**

Our shock pads comply with the latest international standards for environmental responsibility and product performance, including EN 15330-4.

## ✓ **Circular shock pads**

Our shock pads can be recycled in-house, enabling you to contribute to a circular economy.

## ✓ **Zero foam waste**

We collect and reuse foam production waste directly, supporting a closed-loop production process.
